The Loop logo consists of the word "loop" in a white, lowercase, sans-serif font, centered within a light blue square. The background of the entire slide is a yellow grid pattern with white lines.A large, light purple circle with a white outline is positioned in the lower right quadrant of the slide. Inside the circle, the text "Find Your Focus" is written in a bold, dark blue, sans-serif font. The word "Find" is on the top line, "Your" is on the middle line, and "Focus" is on the bottom line. The letters have a slight drop shadow effect.

Find Your Focus

How people work has changed. Rows of cubicles and giant boardrooms have been exchanged for co-operative work stations and breakout areas. As corporate interiors move toward openness, spaces for privacy shrink, yet the need for these spaces remains.

Loop Phone Booths are designed to accommodate this need for privacy - helping you find your focus.

Made to Order

Loop products are customized to suit you! Choose from a variety of exterior and interior finishes to perfectly match your space and your personality. Lead time is ~4 — 6 weeks from order to ship date.

Made in Canada

We stand behind our quality and product performance and use only top quality materials and finishes. Our lead fabricators are red seal journeyman and take pride in ensuring that every product that leaves our shop meets our high standards.

Plug & Play Install

Loop products are built for quick and easy integration in your space. Loop Solo and Loop Cube are designed to fit through all standard doors and elevators for convenient installation and so that they can move with you as your business grows and changes.

User Focused Design

From the ventilation and acoustic dampening system to the ergonomically designed and fully integrated seat and backrest, we pay the utmost attention to the comfort of our users. Having a Loop Phone Booth in your office is a statement that you believe in the value of modern design and the importance of employee well-being.

Loop Solo

The Loop Solo is a plug and play acoustic solution for the individual seeking respite from distraction. Carefully considered design blends acoustic dampening qualities with a durable and easily maintained product. An attractive and effective tool to improve office efficiency and satisfaction in public spaces.

Details

The Loop Solo contrasts a warm wood exterior against bold laminate interiors and upholstery options. Premium materials are combined with an array of features to enhance aesthetic appeal and comfort for a pleasant experience and a productive working environment.

We have specifically designed our phone booth to easily fit through all standard doors and into all elevators in one piece! Install is as easy as unpackaging the booth, moving it into place, and plugging the power cord into your standard wall outlet.

Customizations

One size never fits all, that is why at Loop we offer a wide variety of options to suit your needs and your personal style. There are multiple standard customization options for you to choose from – don't see what you need? Contact us and we'll see if we can make Loop work for you. Let your creativity run wild!

Back Panel: Cork • **Finish:** Maple Veneer

Laminate: Enamel • **Upholstery:** Divina MD 913
Back Panel: Felt • **Finish:** White Oak Veneer

Laminate: Sail White • **Upholstery:** Cloud
Back Panel: Glass • **Finish:** Walnut Veneer

Loop Cube

The Loop Cube provides a comfortably intimate location for one to four and is perfect for informal meetings, interviews, brainstorming sessions, conference calls and other co-working tasks. With the Cube's spacious interior and acoustic dampening qualities you make the most of your office environment without aesthetic or functional compromise.

Details

The Loop Cube is assembled using three sections and comes together to create a quiet and comfortable meeting space. It combines the features of the Loop Solo with a larger footprint ensuring your time spent with coworkers or clients is a productive and positive experience.

We designed the Loop Cube for easy installation — three modules that easily fit through all standard doors and into all elevators before coming together on location. If you need to relocate, simply disconnect, move, and reassemble!

Customizations

The Loop Cube is incredibly versatile with the ability to suit your needs and your personal style. An extensive collection of standard customization options means you can design a loop that's bold and exciting, calm and neutral, or anywhere in between. If you don't see what you need, let us know! We will work with you to design the perfect solution for your space.

Finishes

Make Loop feel at home in your space by choosing finishes that compliment each other and reflect your company's sensibilities. Disclaimer: Please consult our website for up to date offerings

Material • Interior Back Panel

Make Loop feel at home in your space by choosing finishes that compliment each other and reflect your company's sensibilities.

Wood Finish • Exterior

Natural wood veneers mean each booth has a unique grain pattern and personality. Choose between four beautiful hardwood options.

Laminate • Interior Wall

Laminate is hard-wearing, easy to maintain, and available in both bold and neutral colours so you can make Loop stand out in or blend into your space.

Vinyl • Seat Upholstery

This supple and durable vinyl upholstery is easy to clean and has an attractive sheen that accentuates the selection of colours.

Cloth • Seat Upholstery

This stain-resistant polyester and nylon fabric comes in a wide selection of vibrant colours and has a soft yet durable finish.

Felt • Seat Upholstery

This 100% wool upholstery is comfortable, hard-wearing, dirt repellent, and naturally flame retardant. It comes in a selection of beautifully rich colours.

Product Information

Desk

Designed to accommodate a laptop and specified to support 150 lbs.

Exterior Finishes

Hardwood veneer sheeting (maple, cherry, white oak or walnut) with custom pressed plywood front panels. Stainless steel kick plate on front and back of phone booths with stability feet. 3/8" EPDM sunlight and ozone resistant door gasket.

Frame Construction

Interlocking internal frame construction with a non-combustible acoustic insulation to reduce sound transmission.

Interior Finishes

Interior sheeted with high pressure laminate. Colour customizable from list of interior colour offerings on loopphonebooths.com

Back Panel Construction

Three options are available: a.) laminated glass b.) acoustic cork with composite backing c.) 100% natural wool felt with acoustic composite backing.

Glass Door Assembly

Monolithic fully tempered glass door with full round polished edge. Monolithic fully tempered stationary glass with clear sound reduction edge gasket. 180 degree glass-to-glass hinge with brushed nickel finish. Brushed nickel exterior door handle and composite plywood and powder coated steel interior handle with concealed magnets. Adjustable powder coated steel door catch. Active magnetic closure seals the glass door against the EPDM foam gasket.

Seating

Ergonomic bench seat with 6.5 degree angle from horizontal with backrest at a 4 degree angle from vertical.

Connectivity Options

Loop Solo

- Power: 120Vac 15A spill proof power receptacle.
- Power, USB: 120Vac 15A spill proof power receptacle with two usb ports.
- Power, Network: 120Vac 15A spill proof power receptacle with one Cat6 network port.
- Power, Network 2: 120Vac 15A spill proof power receptacle with two Cat6 network ports.
- Power, USB, Network: 120Vac 15A spill proof power receptacle with two usb ports and one Cat6 network port.
- Power, USB, Network 2: 120Vac 15A spill proof power receptacle with two usb ports and two Cat6 network ports.

Product is internally wired and is completely plug and play; all connectivity ports terminate at a junction receptacle that is located under seat. Power cord included plugs into back of the phone booth and then into a standard 120V wall outlet.

Loop Cube

- Power, USB: Two 120Vac 15A spill proof power receptacles with two usb ports.
- Power, USB, Network: Two 120Vac 15A spill proof power receptacles with two usb ports and one Cat6 network port.
- Power, USB, Network 2: 120Vac 15A spill proof power receptacle with one Cat6 network port.

Product is internally wired and is completely plug and play; all connectivity ports terminate at a junction receptacle that is located inside the central table pillar. Power cord included plugs into back of the phone booth and then into a standard 120V wall outlet.

Power Specifications

120V 60hz 7A Max.

Electrical Controls

Fans and lighting controlled by an internal occupancy sensor with preprogrammed delay.

Interior Lighting

Loop Solo

- Single flush mounted gimble LED pot light in the ceiling.

Loop Cube

- Four flush mounted gimble LED pot lights in the ceiling.

Ventilation

A dual-fan active ventilation system in the Loop Solo and a quad-fan active ventilation system in the Loop Cube to maintain comfortable temperatures. Sound absorbing ductwork with sound baffle technology and sound absorbing foam insulation reduces noise entering and exiting the booths through the ventilation system. Ducts capped with high-flow perforated sheets. Fans and corresponding intake ductwork are located under each seat drawing cool air into the booth with secondary fans and corresponding exhaust ductwork located in the ceiling pushing warm air out.

Certifications

Fully certified as conforming to UL STD 962 (Household and Commercial Furnishing) and CSA STD C22.2#203 (Modular Wiring Systems For Office Furniture). ETL Listed (Intertek 5011573)
