

# Loop Flex

## Loop Flex

Proudly designed and manufactured in Canada, Flex is an entirely new type of privacy pod in both form and function. With its soft, pressed PET felt interior and exterior panels, the booth effortlessly absorbs office noise inside and out resulting in a quieter, more focused work environment.

## Features

Flex has a low transition floor and is designed for either standing or sitting (counter height stool not included). The product ships flat packed, and assembles on site in under one hour.

## Occupancy

Single Person Occupancy

## Weight

400 lbs

## Specifications

### Exterior

Light grey, formed PET felt panel exterior with sandtex traffic white powder coated sheet metal kick plates.

### Desk

Integrated, standing height desk with durable, easy to clean, matte grey linoleum top surface. Charging cable pass through.

### Interior

Fluted PET felt interior with perforated sandtex traffic white powder coated acoustic back panel. Custom order RAL colour options for the back panel are available upon request.

### Electrical

Two integrated power ports and two USB ports. Two active fan ventilation system. Power to the booth runs off of an occupancy sensor. Included power cord plugs into a standard 120v wall outlet. Hardwired cord available upon request.

## Measurements

### Booth

H 86" / W 39" / L 37.5"

### Desk

H 1.5" / W 27.75" / L 13"

## Certifications

Electrical system is UL and ETL certified.

PET felt interior and exterior sheeting has a Class A FSI and SDI as tested to ASTM E-84 and a FSR of 20 and SDC of 420 as tested to CAN/ULC-S102.

PET felt sheeting contains up to 50% recycled fiber content and contributes to LEED v4 points for Building Design + Construction and Interior Design + Construction.
